Hello Muhammad Naufal Labib Ramadhan,

Attached is your #2 Soft Skill Assignment Feedback

Soft Skill Assignment 2 "Time Management"

Your Score: 87.9

Hi there! You put a lot of effort into your essay, and it shows! 1. Do it now! Important and Urgent. Number 6 and Number 3. Why? Considering Sofía will get a promotion in her workplace, the organization would want to see the result of her task given. Therefore she has to prioritize work first to give a good impression by performing well as a new joiner in an organization or a company she is currently at. Also, the deadlines mentioned were clear. One is due this evening, and the other is due in 3 days. 2. Schedule! Important and Less Urgent. Number 1 and Number 5. Why? Sofía has a first birthday party, yet she feels very mild at this point; therefore, instead of seeing a doctor right away, it would be best to arrange an appointment and hold daily maintenance as she only needs to be on standby. 3. Delegate! Less Important and Urgent. Number 2 and Number 9. Why? Sofía's birthday is coming up, and she will have a next break. It would be best if she could delegate by asking a sibling or if there is not, there are existing e-commerce sites where she could order her gifts because Sofía is very occupied. 4. Drop! Less Important and Less Urgent No 4 and No 7. Why? Sofía's birthday is coming up, and entertainment is also essential. However, it would be more fulfilling once she has completed the ones above, and the school's virtual reunion can also be dropped, as there is no urgency to it. Overall, you are doing a great job, and we appreciate your hard work.

Note: For those of you who are late or have not completed the assignment yet, we will not send your assignment score and feedback.

Thank you and have a great week!

Hello MUHAMMAD NAUFAL LABIB RAMADHAN,

Attached is your #3 Soft Skill Assignment Feedback

Soft Skill Assignment 3 "Critical Thinking and Problem Solving"

Your Score: 91

Hi there, thank you for completing this assignment, you did an excellent job! Your 5 Why analysis is good and has a nice flow. Based on the problem statement, the study, "How can PT Hero Supermarket (Giant) survive as a business while still being relevant to market demand in Indonesia?" and the answer for each "Why" should answer the previous one. You have addressed the root cause of the problem using those five questions. Good job on this! You can also take a look at this example of root cause analysis: Root Cause Analysis - Shifting consumer lifestyle from offline to online. Online sales need to be fostered to support Hero Supermarket's future business growth. Hopefully, with this assignment, you can have a better understanding of the framework in using 5 Why analysis. Keep up the excellent work!

Note: For those of you who are late or have not completed the assignment yet, we will not send your assignment score and feedback.

Thank you and have a great week!

5 WAYS OF ADAPTABILITY
BANGKIT 2023

MUHAMMAD NAUFAL LABIB RAMADHAN

Life at Bangkit: 5 Ways of Adaptability

 Muhammad Naufal Labib Ramadhan
Mobile & Frontend Web Developer | Mobile Development Graduated from Bangkit Academy 2023 Batch 2 | Freelance Video Editor & Graphic Designer

October 15, 2023

When I joined the Bangkit 2023 Batch 2 program, I embarked on an extraordinary journey of personal and professional growth. The program was designed to challenge us and push us beyond our comfort zones, and it did just that. One of the key lessons I learned during this time was the importance of adaptability.

Throughout the program, we faced numerous challenges and obstacles. From technical difficulties to cultural differences, there were many things that could have easily thrown us off track. However, by staying adaptable and open-minded, we were able to overcome these challenges and emerge stronger and more confident than ever before.

One of the most effective ways to develop adaptability is to embrace change and see it as an opportunity rather than a threat. This means being willing to learn new skills, try new things, and approach problems from different angles. It also means being flexible in our thinking and willing to pivot when necessary.

Another key factor in developing adaptability is resilience. Resilience is the ability to bounce back from setbacks and continue moving forward even when things don't go as planned. This requires a positive attitude, a growth mindset, and a willingness to take risks.

In conclusion, adaptability is a crucial skill for success in today's fast-paced world. By developing this skill through experience and practice, we can become more resilient, more successful, and more fulfilled individuals.
