

MUHAMMAD NAUFAL LABIB RAMADHAN

SOFTWARE ENGINEER

muhammadnaufallabibbramadhan@gmail.com | [089696949439](tel:089696949439) | linkedin.com/in/naufallabibb
portfolio-naufallabibb.vercel.app | github.com/Naufallabibb | Yogyakarta, Indonesia

A final-year Informatics Engineering student at Ahmad Dahlan University who has completed a thesis research project and is currently preparing graduation requirements. A graduate of the IDCamp React Developer, Bangkit Academy Android Developer, and DigistarClass Hustler programs with hands-on experience through internships at PT. Vortex Buana Edumedia, PT. Agro Mulia Internasional, and a thesis project with the Environmental Laboratory in Kapuas Regency. Experienced in handling various projects, including Neutron Pengguna, Neutron Pendidikan, Neon Uji Dashboard 2.0, the Toko Mitra Tani e-commerce platform, and an environmental testing service booking platform. Currently enrolled in AWS Back-End Academy while deepening JavaScript fundamentals to enhance critical problem-solving skills. Ready to contribute technical expertise and a collaborative mindset to help teams deliver high-quality digital solutions. A fast learner with proven adaptability across diverse technology stacks.

TECHNICAL SKILLS

Languages: JavaScript, Typescript, C++, Java, HTML/CSS, Python, PHP

Query Language/API: GraphQL, REST API

Deployment: Vercel, Hostinger Premium

Framework: Node.js, Express.js, Bootstrap, TailwindCSS, Laravel, Alpine.js, Vue.js, Nuxt.js, Next.js, Flask

Library: React.js, Filament, Livewire, ShadcnUI

Tools: Git, MongoDB, MySQL, Excel, CodaTrack, Figma, WordPress, WSL

Concepts: Software Engineering, Frontend, Backend, Agile, MVC, Waterfall, Data Visualization

PROFESSIONAL EXPERIENCE

Laboratorium Lingkungan Dinas Lingkungan Hidup dan Kehutanan Kabupaten Kapuas

October 2024 – October 2025

Fullstack Developer (Project-based / Undergraduate Thesis Project)

Kapuas, Indonesia (Hybrid)

- Developed Government Environmental Laboratory Management System: Built comprehensive web application using TALL Stack (TailwindCSS, Alpine.js, Laravel, Livewire) with Filament admin panel for managing environmental testing services, sample tracking, and laboratory operations for Kapuas Regency government
- Implemented Full-Stack Solution with Modern Architecture: Designed and developed complete system including user management, sample registration, testing workflows, report generation, and administrative dashboard with real-time data processing and responsive design for government stakeholders and public access

PT. Vortex Buana Edumedia

April – July 2025

FrontEnd Developer

Umbulharjo, Yogyakarta (Hybrid)

- Mastered 10 Modern Web Technologies and Built 6 Major Applications: Proficient in Vue 3, Nuxt 3, TypeScript 5, GraphQL, TailwindCSS, Shadcn-Vue, Storybook, Dynamic Routing, Git/GitHub/GitLab, and WSL through hands-on development of landing pages, dashboard systems, filtering applications, and user onboarding systems
- Development Projects: Developed 17+ reusable UI components for Neon-Uji Office 2.0 dashboard modernization, created dynamic educational filtering system (Neutron Pengguna) with multi-level sorting (SD→SMP→SMA→University), expanded role-based access control (Neutron Pendidikan), and implemented email notification templates with GraphQL-MongoDB integration.

PT. Agro Mulia Internasional

March – July 2025

Landing Page Builder Intern (Wordpress & Figma)

Sleman, Indonesia (Remote)

- Developed and optimized landing pages for product advertising, including content writing, web implementation, and layout design based on predefined templates. Additionally, rebranded Agro

- Mulia International's website to enhance branding and user experience.
- Conducted information analysis to improve website content relevance and structure while ensuring high-quality, functional, and visually appealing web pages within deadlines.

Management Proyek E-Commerce "Toko Mitra Tani Klaten"

February - August 2024

Project Manager and Fullstack Developer (Contract)

Klaten, Indonesia (Hybrid)

- Improved inventory and transaction management by providing an easy-to-use web-based system.
- Supported smooth store operations with features such as stock tracking, sales reporting, payment, and customer management.

EDUCATION

University Ahmad Dahlan

GPA: 3.78/4.0

Bachelor's Degree in Informatics

Yogyakarta, Indonesia

September 2021 – Present

Relevant Coursework: *Programming Fundamentals, Calculus for Informatics, Informatic Logic, Data and Information Management, Algorithm Programming, Discrete Mathematics, Web Programming, Database, Object-Oriented Programming, Data Structure, Algorithm Strategy, Software Analysis and Design, Software Engineering, Operating Systems, Computer Security, Data Visualization, Artificial Intelligence, Computer Vision, Statistical Informatics.*

AWS Back-End Academy 2025

Bandung, Indonesia (Remote)

Back-End Developer

April 2025 - Present

Relevant Coursework: *Cloud Computing Fundamentals, Generative AI on AWS, JavaScript Programming, Node.js & Express.js, RESTful API Development, Authentication & Authorization, Clean Architecture, Automation Testing, Continuous Integration & Deployment (CI/CD), Scalable Back-End Systems*

Indosat Ooredoo Hutchison Digital Camp

Jakarta, Indonesia (Remote)

React Developer (Intermediate Level)

September 2024 – March 2025

Relevant Coursework: *React.js Development, Frontend Development, JavaScript ES6+, Component-Based Architecture, Responsive Web Design*

Digistar Class by Telkom Indonesia

Bandung, Indonesia (Remote)

Hustler Mentee

August 2024 – September 2024

Relevant Coursework: *Business Ideation & Development, Agile Development Practices, Product Roadmapping, Market Research and Analysis, Leadership and Team Collaboration, Pitch Deck Preparation, Strategic Problem Solving.*

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

Bandung, Indonesia (Remote)

Mobile Development (Android Developer)

August 2023 – January 2024

Relevant Coursework: *Android App Development (Kotlin), Clean Architecture Principles, Material Design Guidelines, Firebase Integration, Unit Testing and Debugging, RESTful API Integration, Offline Data Storage (Room), Git and Version Control, Agile and Scrum Methodologies*

PROJECT & OTHER EXPERIENCES

Horus Naufal Exam | Flask, Vue.js

September 2025

- Developed a fullstack user management application with Flask REST API (JWT, CRUD, database migration, server-side validation) and Vue.js frontend (authentication, interactive dashboard, search & pagination, protected routes).
- Applied best practices including JSON API responses, modular structure, separation of concerns, password hashing, and real-time data integration with Axios.

Labling DLHK Kab.Kapuas Website | TALL, Filament

October 2024 –

October 2025

- Created Environmental Laboratory Management System: Built TALL Stack application (TailwindCSS, Alpine.js, Laravel, Livewire) with Filament admin panel for government environmental data management and compliance tracking
- Enhanced User Experience: Implemented responsive design with efficient data communication

ensuring smooth laboratory operations and real-time updates

LandingPage Gaiavera | *Wordpress, Figma*

April – July 2025

- Developed and optimized landing pages for product advertising using WordPress with Elementor, including content writing, and web implementation. Rebranded Agro Mulia International's website to enhance branding and user experience.
- Conducted information analysis to improve website content relevance and structure while ensuring high-quality, functional, and visually appealing web pages within deadlines. Created comprehensive design systems and layouts using Figma for consistent visual identity.

Neon Uji Dashboard 2.0 | *ShadcnUI, Storybooks, Nuxt.js, Typescript, Nuxt Router*

May – July 2025

- Built Comprehensive Quiz Management Platform: Developed dashboard modernization using Vue 3, Nuxt 3, and TypeScript with 17+ reusable UI components including navigation, pagination, and quiz management modules
- Implemented User Experience Enhancements: Created email notification system, user onboarding tooltips, and seamless GraphQL-MongoDB integration for optimal performance

Neutron Pengguna | *GraphQL, Nuxt.js, Typescript, MongoDB*

April – May 2025

- Built Educational Filtering System: Developed Vue 3 application with dynamic multi-level filtering for educational institutions (SD→SMP→SMA→University) using TypeScript and TailwindCSS
- Implemented GraphQL Integration: Utilized GraphQL for efficient data fetching from MongoDB database with real-time filtering and multiple sorting capabilities

Neutron Pendidikan | *Typescript, Nuxt.js*

May 2025

- Developed Role-Based Access Control System: Created Vue 3 application to expand user permissions from admin-only to multi-role access (employees/branch offices) using TypeScript
- Enhanced Import Assessment Features: Implemented assessment import functionality for multiple user roles with secure data handling and validation

Toko Mitra Tani Website | *PHP Native, MySQL*

February - August 2024

- Improved inventory and transaction management by providing an easy-to-use web-based system.
- Supported smooth store operations with features such as stock tracking, sales reporting, payment, and customer management.

Capstone Project Bangkit Academy –

August – December

Outfit Recommendation App | *Jetpack Compose, Kotlin*

2023

- Developed an Android application that helps users choose outfits based on preferences.
- Leveraged recommendation algorithms to enhance the user experience in finding outfit combinations.

Miliikody Web Profile | *React.js, Vercel*

September 2024

- Created a profile website showcasing the products and services of the Miliikody accessories business.
- Provided an interactive platform for customers to easily explore the brand and its product collections.

Portfolio Profile | *React.js, ESLint, Vercel*

September 2024

- Designed a professional online portfolio to showcase projects, experiences, and personal expertise.
- Simplified the process for clients and recruiters to evaluate qualifications and past works.

QuizApp Dot Indonesia | *React.js*

October 2024

- Developed an educational quiz application to enhance interactive learning for users.
- Delivered an enjoyable learning experience with an attractive and user-friendly interface design.

Campus Expo OOP | *Java Native*

January 2023

- The application was designed to implement Object-Oriented Programming (OOP) concepts such as inheritance, encapsulation, polymorphism, abstraction, composition, association, and aggregation.

ORGANIZATION & VOLUNTEER

Himpunan Pengusaha Muda Perguruan Tinggi (HIPMI-PT) UAD

Yogyakarta, Indonesia

Head of Communication Media, Information, and Publication Division

October 2022 – March 2024

- Designed and implemented effective communication strategies for the organization.
- Led teams in creative content creation, including graphic design and social media management.
- Managed media relations, ensuring successful publication of organizational activities.

Ikatan Mahasiswa Muhammadiyah (IMM) FTI-UAD

Yogyakarta, Indonesia

Secretary of Entrepreneurial Economy

February – December 2023

- Organized self-development events focused on business, economy, and entrepreneurship.
- Actively contributed to the coordination and documentation of internal IMM activities.

Harisenin.com
Career Volunteer

Jakarta Selatan, Indonesia (*Remote*)
August 2022

- Created posters, CVs, and copywriting materials to support the platform's career needs.
- Achieved second place in the Best Design and Powerful Caption competition.

SejutaCita
Volunteer Brand Ambassador

Jakarta Selatan, Indonesia (*Remote*)
October – November 2021

- Promoted Sejutacita Future Leaders (SFL) activities through social media and participant interactions.
- Gained experience in event promotion and client relationship management.
