github.com/Naufallabibb | Yogyakarta, Indonesia

Final-year Informatics student at Ahmad Dahlan University, specializing in web development with modern technologies like React and Laravel. Successfully passed the IDCamp React Developer Intermediate level and currently progressing toward the Expert class selection. Experienced in managing IT projects as a Project Manager and Fullstack Developer, including the Toko Mitra Tani Klaten e-commerce project, which implemented a web-based inventory and transaction management system. Developed various web applications, such as a task management app (Todo List Web), CRUD systems using the MERN Stack, and interactive admin dashboards with Laravel Filament. While familiar with backend technologies like Node.js, Express.js, MongoDB, and MySQL, I acknowledge that I am still in the learning phase. However, I am committed to mastering them quickly through continuous practice and real-world projects. Currently expanding expertise by exploring Vue, Angular, Spring Boot, and Tailwind CSS. Actively engaged in development programs like IDCamp React Developer, Bangkit Academy Android Developer, and Digistar Class Hustler to stay updated with industry trends. Passionate about building innovative and impactful digital solutions, with a strong drive to grow into a professional web developer.

TECHNICAL SKILLS

Languages: C++, JavaScript, Java, HTML/CSS, Python, PHP

Framework: Node.js, Express.js, Bootstrap, React, Tailwind, Laravel, Alpine.js

Library: React, Filament, Livewire

Tools: Git, MongoDB, MySQL, Tableau, Excel

Concepts: Software Engineering, Frontend, Backend, Agile, REST API, MVC, Waterfall, Data Visualization

PROFESSIONAL EXPERIENCE

Independent Projects

Graphic Designer (Freelance)

September 2021 – Present

Yogyakarta, Indonesia (Remote)

- Created various graphic designs such as posters, logos, social media feeds, and banners to support clients' promotional needs.
- Delivered creative design solutions to enhance visual appeal and business branding.

Management Proyek E-Commerce “Toko Mitra Tani Klaten”

Project Manager and Fullstack Developer (Contract)

February - August 2024

Klaten, Indonesia (Hybrid)

- Improved inventory and transaction management by providing an easy-to-use web-based system.
- Supported smooth store operations with features such as stock tracking, sales reporting, payment, and customer management.

EDUCATION

University Ahmad Dahlan

Bachelor of Computers in Informatics

GPA: 3.77/4.0

Yogyakarta, Indonesia

September 2021 – Present

Relevant Coursework: Programming Fundamentals, Calculus for Informatics, Informatic Logic, Data and Information Management, Algorithm Programming, Discrete Mathematics, Web Programming, Database,

Object-Oriented Programming, Data Structure, Algorithm Strategy, Software Analysis and Design, Software Engineering, Operating Systems, Computer Security, Data Visualization, Artificial Intelligence, Computer Vision, Statistical Informatics.

Indosat Ooredoo Hutchison Digital Camp

Jakarta, Indonesia (Remote)

React Developer

September 2024 - Present

Relevant Coursework: React.js Development, Frontend Development, JavaScript ES6+, Component-Based Architecture, Responsive Web Design

Digistar Class by Telkom Indonesia

Bandung, Indonesia (Remote)

Hustler Mentee

August 2024 – September 2024

Relevant Coursework: Business Ideation & Development, Agile Development Practices, Product Roadmapping, Market Research and Analysis, Leadership and Team Collaboration, Pitch Deck Preparation, Strategic Problem Solving.

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

Bandung, Indonesia (Remote)

Mobile Development (Android Developer)

August 2023 – January 2024

Relevant Coursework: Android App Development (Kotlin), Clean Architecture Principles, Material Design Guidelines, Firebase Integration, Unit Testing and Debugging, RESTful API Integration, Offline Data Storage (Room), Git and Version Control, Agile and Scrum Methodologies

PROJECT & OTHER EXPERIENCES

Toko Mitra Tani Website | PHP Native, MySQL

February - August 2024

- Improved inventory and transaction management by providing an easy-to-use web-based system.
- Supported smooth store operations with features such as stock tracking, sales reporting, payment, and customer management.

Capstone Project Bangkit Academy –

August – December 2023

Outfit Recommendation App | Jetpack Compose, Kotlin

- Developed an Android application that helps users choose outfits based on preferences.
- Leveraged recommendation algorithms to enhance the user experience in finding outfit combinations.

NotesApp Theme | React.js

January 2025

- Implemented State Management using React Hooks (useState, useEffect, useContext) to dynamically manage the app theme.
- Utilized Component Composition and Prop Drilling to build a modular and reusable UI.

Miliikody Web Profile | React.js, Vercel

September 2024

- Created a profile website showcasing the products and services of the Miliikody accessories business.
- Provided an interactive platform for customers to easily explore the brand and its product collections.

Portfolio Profile | React.js, ESLint, Vercel

September 2024

- Designed a professional online portfolio to showcase projects, experiences, and personal expertise.
- Simplified the process for clients and recruiters to evaluate qualifications and past works.

QuizApp Dot Indonesia | React.js

October 2024

- Developed an educational quiz application to enhance interactive learning for users.
- Delivered an enjoyable learning experience with an attractive and user-friendly interface design.

September 2024

Todo List Web | React.js

- Created a simple task management application to help users organize their daily schedules.
- Provided features such as adding, editing, and deleting tasks with an intuitive interface.

Bookshelf App | React.js

September 2024

- Developed a digital bookshelf application enabling users to store a list of books they own or wish to read.
- Supported book searches with category and reading status filter features.

CRUD & API MERN Stack | MongoDB, Express.js, React.js, Node.js

September 2024

- Built a MERN-based CRUD application capable of securely and efficiently managing user data.
- Used axios for communication between the frontend, database, and backend to ensure fast and stable data transfer.

CRUD Laravel | PHP, Laravel 11, MySQL

September 2024

- Designed a Laravel-based CRUD system to support user data and inventory management.
- Integrated automatic data validation to maintain data integrity.

CRUD Laravel Filament | PHP, Laravel 10, MySQL, Filament

October 2024

- Enhanced productivity by leveraging Filament as the framework for admin dashboard management.
- Simplified data management with an interactive and user-friendly admin interface.

Campus Expo OOP | Java Native

January 2023

- The application was designed to implement Object-Oriented Programming (OOP) concepts such as inheritance, encapsulation, polymorphism, abstraction, composition, association, and aggregation.

ORGANIZATION & VOLUNTEER

Himpunan Pengusaha Muda Perguruan Tinggi (HIPMI-PT) UAD

Yogyakarta, Indonesia

Head of Communication Media, Information, and Publication Division

October 2022 – March 2024

- Designed and implemented effective communication strategies for the organization.
- Led teams in creative content creation, including graphic design and social media management.
- Managed media relations, ensuring successful publication of organizational activities.

Ikatan Mahasiswa Muhammadiyah (IMM) FTI-UAD

Yogyakarta, Indonesia

Secretary of Entrepreneurial Economy

February – December 2023

- Organized self-development events focused on business, economy, and entrepreneurship.
- Actively contributed to the coordination and documentation of internal IMM activities.

Harisenin.com

Jakarta Selatan, Indonesia (*Remote*)

Career Volunteer

August 2022

- Created posters, CVs, and copywriting materials to support the platform's career needs.
- Achieved second place in the Best Design and Powerful Caption competition.

SejutaCita

Jakarta Selatan, Indonesia (*Remote*)

Volunteer Brand Ambassador

October – November 2021

- Promoted Sejutacita Future Leaders (SFL) activities through social media and participant interactions.
- Gained experience in event promotion and client relationship management.

COURSES & CERTIFICATION

- [Introduction to Figma](#) (2023), MySkill.
- [Introduction to Programming Logic \(Programming Logic 101\)](#) (2023), Dicoding.
- [Basic Data Science](#) (2023), Dicoding.
- [Basic Project Management](#) (2023), Dicoding.
- [Git basics with Github](#) (2023), Dicoding.
- [Mobile Development](#) (2023), Bangkit Academy
- [Learn SOLID Programming Principles](#) (2023), Dicoding.
- [Start Programming with C](#) (2023), Dicoding.
- [Basic Structured Query Language \(SQL\)](#) (2023), Dicoding
- [Create Android Apps with Jetpack Compose](#) (2023), Dicoding.
- [Getting Started Programming in Python](#) (2023), Dicoding.
- [Get Started Programming with Kotlin](#) (2023), Dicoding.
- [Create Android Apps for Beginners, Fundamentals, and Intermediate](#) (2023), Dicoding.
- [Get Started with Programming Basics to Become a Software Developer](#) (2023), Dicoding.
- [Intro to Data Analytics](#) (2024), RevoU.
- [Basic Concept React](#) (2024), Myskill.
- [Learn AI Basics](#) (2024), Dicoding.
- [Learn Web Programming Basics](#) (2024), Dicoding.
- [Learn JavaScript Basics](#) (2024), Dicoding.
- [Learn to Create Web Apps with React](#) (2024), Dicoding.
- [Introduction To React](#) (2024), Myskill
- [Software Engineer Intern](#) (2024), HackerRank
- [Software Engineer](#) (2024), HackerRank
- [Learn to Create Front-End Web for Beginners](#) (2024), Dicoding.
